

Digital Services For a Digital World

The digital world evolves.

Printergy has eased issues relating to accessing legacy media & data files. We have the equipment. Today, we take pictures/videos on cell phones, leave messages on a web server, post web documents & pictures.

Printergy help.

We take cell messages & video off of web servers, combine cell video clips onto a DVD, We will continue to create video, re-record audio & video and duplicate discs. Going forward, Printergy is evolving...Our latest change put you into Digital Video Editor Chair as we render **Do It Yourself Hi Def** video.

History & Heritage Comes from many sources

Bringing New Life to Media[®]

TIME AND TECHNOLOGY

Audio and video recording devices change over time causing Boomers to wonder about contents of Super 8 film or 78 rpm records. In the 70's & 80's, we had a "format" war between VHS and Beta. LP vinyl records, HI 8 media, Walkman Audio devices have come and gone. Personal computers & technology continue to influence video & music enjoyment.

Digital photography edged out film but we still have film—now photos & pictures are on our phones and they need to be shared elsewhere.

Throughout this digital sea change, Printergy can navigate you through the shifting format requirements and device usage.

**WE DIGITIZE
HERITAGE**

LATEST TECHNOLOGY

Big Screen HD TVs is demanding and particular. Specific equipment and properly developed video is needed.

HD video requires compliance steps. An HD camera shooting HD video is best ... then "rendered" at 1080p ... written to a Blu Ray disc. Older video film can be up-graded to HD video with modest quality improvement.

HD SLIDES & PICTURES

The next best thing to re-taking images is scanning slides & pictures at a high DPI rate (3,000 DPI) to avoid pixelization. Digital publishing tools can vamp up the image quality.

FYI taking digital pictures of art work is great application.

**Printergy says:
BE A CREATIVE DIY EDITOR**

IF YOU NEED MORE THAN ONE

Printergy has in-house duplication facilities. Printergy can image / print:

- 500+ per day & surface printed
- any design presented in Adobe Photoshop or PDF.
- Develop Auto Start CDs—Adobe PDF consulting.
- NTSC, PAL, SECAM, etc

We also have packaging.
